EOIS-SP Connect Release 18.1

The ministry is pleased to announce that EOIS-SP Connect Release 18.1 launched to service providers and ministry staff on April 20, 2018.

What's New?

Itinerant Delivery Location

A new Itinerant Delivery Location panel to capture itinerant service delivery for each site by program was added to the Service Provider tab. This panel is available to edit by all service provider roles as well as select ministry staff.

Better Search

SP Connect users will be pleased to learn that when returning to the search panel after conducting a search, all search criteria entered in the most recent search remains. This change applies to the following search panels:

- List Business Plan packages
- List Agreements
- List Adjustments
- List Monitoring Reports
- List Service Provider Forecasts

Combined Agreements

For the 2018-2019 fiscal year, one combined agreement was created for the Employment Service (ES) and Youth Job Link (YJL) programs and another agreement for the Youth Job Connection (YJC)/Youth Job Connection Summer (YJCS) programs. When searching for information for Youth Job Link or Youth Job Connection Summer, use the parent program's name, ES or YJC, in the search criteria. When generating reports, searches can be conducted using either program name (e.g. ES or YJL, YJC or YJCS).

Printing TA adjustments

A new print icon was added to the Target and Allocation page within SP Connect. The print icon allows service providers to save or print the information displayed on the page.

Payment Schedule Increased Visibility

An expand all/collapse all feature was added to the Payment Schedule. Clicking any month listed on the Payment Schedule expands to display additional financial details such as payment/invoice #'s and business unit codes for all months displayed.
