How to Use this Document

Welcome to the Ontario Ministry of Training, Colleges and Universities first annual Detailed Report on Key Performance Indicators (KPIs) for registered private career colleges (PCCs).

In the pages that follow, you will find KPIs for Graduation Rate, Graduated Employment Rate, and Graduate Employment Rate in the Field of Study for students who graduated in, or who were scheduled to graduate in 2013, at PCCs registered with the Superintendent of Private Career Colleges, and approved to receive students funded by the Ontario Student Assistance Program (OSAP).

In this document, KPIs have been organized at four levels:

1. Sector level
2. Program type level
3. Program category level
4. Individual program level

The sector level includes rates for all PCCs participating in the 2013 KPI report. Programs offered by PCCs in Ontario are broken down into program types, and program categories. In this report, there are 13 program types, ranging from applied arts and sciences, to business, and trades. There are 103 program categories included in this report, and 1,459 programs each belonging to a specified program category.

Further definitions and methodologies have been laid out in the Key Performance Indicators: An Overview and Calculations and Definitions sections.

Navigation

To quickly and efficiently navigate the report, you can use hyperlinks to jump to pages containing the information you are looking for. You can identify a hyperlink by its blue colour and underline. For those using screen readers, all hyperlinks have been identified by the hyperlink style.

As you will see, hyperlinks have been added to each program type and program category in the tables throughout the report. These hyperlinks will bring you directly to the table that further breaks out that program type into program categories, or the program category into individual programs. Following each table, hyperlinks have been added to quickly bring you back to the program type or program category associated with the table you are viewing.
Key Performance Indicators: An Overview

Measuring Success after Graduation

How many students successfully graduate from private career colleges? Do graduates find jobs and are these jobs related to their training?

Since 2013, Ontario’s PCCs have been required to provide student and graduate information to a third party service provider that surveys graduates to collect survey data that sheds light on these questions. The survey data is analyzed to calculate measurable values called Key Performance Indicators – or KPIs.

KPIs demonstrate how students have fared after graduating from vocational programs provided by Ontario’s PCCs. KPIs can help students make more informed decisions about their postsecondary education and help institutions identify areas of strength and weakness and opportunities for improvement.

The KPI Process

Under the authority of subsection 53 (1) (a) of the Private Career Colleges Act, 2005, the Superintendent of Private Career Colleges set out five KPIs for PCCs in Policy Directive #11:

1. Graduation Rate;
2. Graduate Employment Rate;
3. Graduate Employment Rate in the Field of Study;
4. Graduate Satisfaction Rate; and
5. Employer Satisfaction Rate.

Graduation rate is calculated from audited enrolment and graduate data submitted by PCCs three times per year. The other four KPIs are calculated from a Graduate Outcomes Survey taken by graduates six months after graduation, and an Employer Satisfaction Survey taken by employers when a graduate consents.

In addition, the ministry calculates Ontario Student Assistance Program (OSAP) loan default rates for PCCs approved to accept OSAP-assisted students, which are also considered a performance indicator for the sector.

The Superintendent publishes PCC KPIs annually in the fall or winter of the year after a data collection cycle began. In 2013 and 2014, only PCCs with OSAP-approved programs were required to participate. All PCCs will be required to participate in 2015.
Calculations and Definitions

Reading and Understanding the Numbers

Throughout the report, you will see “SS” and “ND” in place of KPI rates. “SS” means “Small Sample” and is used to indicate when the sample size of enrolled students for a particular program or program category is less than five.

Programs or program categories that include less than five enrolled students are noted with an “SS” to protect the privacy of the individuals who participated in those programs. However, these students are still included in the accumulative program category (if the category contains more than five enrolled students), program type and sector level results.

For the Graduate Employment Rate and Graduate Employment Rate in the Field of Study, programs or program categories that contained five or more enrolled students, but less than five eligible graduates who participated in the Graduate Employment survey are presented in the report. As a result, many programs may show very high (100%) or very low (0%) Graduate Employment Rates and Graduate Employment Rates in the Field of Study due to only one or two graduates participating in the survey. It is important to remember this context when reading program level results.

Additionally, in the few cases where the number of enrolled students is less than five, but the number of eligible graduates participating in the graduate employment study is greater than five, Graduate Employment Rates and Graduate Employment Rates in the Field of Study have been included.

Finally, “ND” means “No Data” and is used to indicate that there were no enrolled students or graduates that met the necessary criteria to be included in that calculation.

Graduation Rate

The Graduation Rate is the percentage of graduates divided by the number of enrolments. It is calculated at the program, campus, institution, and sector levels. For program level rates, the number of enrolments includes the number of students transferring into the program, and excludes the number that transferred out.

Students have 200% of a program’s duration to graduate in order to be considered a graduate in the Graduation Rate; for example, for a 26 week program, students would need to graduate within 52 weeks of enrolment to be considered a graduate for this rate.

Graduate Employment Rate

The Graduate Employment Rate is the percentage of graduates employed six months following graduation divided by the number of graduates in the labour force.

The labour force is defined as those employed, those not employed but looking for a job, or those not employed but who have accepted a job to start shortly. This KPI is calculated by contacting graduates six-months following graduation, and asking the following survey question:

“During the week of [week identified as six-months after graduation] were you...
1. Employed or self-employed?
2. Employed or self-employed, but looking for another job?
3. Not employed, but had accepted a job to start shortly?
4. Not employed, but looking for a job?
5. Not employed, but not looking for a job?"

**Graduate Employment Rate in the Field of Study**

The Graduate Employment Rate in the Field of Study is the percentage of graduates employed in a related or partially related field to what they studied and graduated in, divided by the number of graduates in the labour force.

This KPI is calculated by contacting graduates six-months following graduation, and asking the following survey question:

“Was this job related to the [program name] program that you graduated from?

1. Yes
2. Yes, partially
3. No
4. Don't know”
**Sector Rates**

This table shows the collective 2013 KPI rates for private career colleges approved to receive students funded by the Ontario Student Assistance Program.

Rates by Program Category

In the pages that follow, program types are broken out into program categories and presented alongside the three KPIs for PCCs approved to receive students funded by OSAP. For comparison, KPI rates for each program type and the sector are shown at the bottom of each table. Program categories have been organized alphabetically.

To further explore a program category, and see KPIs for the individual programs offered by PCCs under these categories, please click on the program category name you wish to explore.

If you wish to go back to see KPI results by program type, please click “Return to Rates by Program Type” located below each table.

Rates by Program

In the pages that follow, program categories are broken out to show each program within that category and presented alongside the three KPIs for PCCs approved to receive students funded by OSAP. For comparison, KPI rates for the corresponding program category and the sector are shown at the bottom of each table. Programs have been organized alphabetically.

If you wish to further explore a program's results, or to see KPIs for an entire PCC, please visit the Superintendent's PCC KPI webpage at http://www.tcu.gov.on.ca/pepg/audiences/pcc/ and see the KPI reports organized by PCC.

If you wish to go back to see KPI results by the corresponding program category, please click the “Return to Program Category” located below each table.

If you wish to go back to see KPI results by program type, please click “Return to Rates by Program Type” located below each table.
